

# Principal International Small Company Fund

Second quarter 2026

## Fund overview

The Fund seeks long-term capital growth by investing in equity securities of small-capitalization companies domiciled in developed countries outside of the United States.

## Ticker

**Class I: PISMX**

Class R6: PFISX

## Portfolio management

**Brian Pattinson, CFA**

32 years of experience

**Tiffany Lavastida, CFA**

30 years of experience

## Fund information

|                                   | Fund     | Index  |
|-----------------------------------|----------|--------|
| Fund AUM                          | \$328.4M | —      |
| Number of holdings                | 106      | 2,245  |
| Active share                      | 93.0%    | —      |
| Market cap <sup>1</sup>           | \$5.6B   | \$3.7B |
| Earnings growth <sup>2</sup>      | 15.7%    | 12.0%  |
| Earnings revision <sup>3</sup>    | 59.4     | 50.9   |
| Price/earnings (FY1) <sup>4</sup> | 17.3x    | 16.1x  |
| Return on equity (last 12 months) | 11.9%    | 10.1%  |

Source: FactSet

<sup>1</sup> Weighted median

<sup>2</sup> Average of trailing one-year and forward one-year earnings per share (EPS growth)

<sup>3</sup> Percentage of companies with positive EPS revisions.

<sup>4</sup> Forward one-year price/earnings estimates

**Active share:** Measures how much different portfolio weights in securities are from benchmark weights. The higher the active share, the more the portfolio differs from the benchmark.

Reported FactSet data is subject to revision over time, which may result in slight differences among data points reported during the same period.

## Early movers on underappreciated opportunities

- Investing in businesses we believe are becoming better as a result of positive change: innovators, renovators, and pacesetters.
- Identifying potential underappreciated growth and improvement opportunities ahead of the market.
- An experienced team powered by perspective and precision. The portfolio managers have co-managed strategies since 2006.

## We focus on investing in businesses we believe are becoming better

### INNOVATORS

- Industry disruptors and developers
- Forging new markets and solutions
- Progressive research and development

### RENOVATORS

- Positive changes putting firms back on track
- Self-help improvements, cyclical recoveries

### PACESETTERS

- Established steady growers with strong competitive profiles
- Ongoing continual improvement

## Why allocate to a portfolio:

- Compelling growth and value characteristics for investors seeking core international small-cap equity exposure diversified across sectors and regions
- Seeks to isolate stock selection as the key driver of results, while avoiding unrewarded risks

Morningstar percentile rankings are based on total returns. Morningstar ratings are based on risk-adjusted returns.

**Returns represent past performance and do not guarantee future results. Share price, principal value, and return will vary and you may have a gain or loss when shares are sold. Current performance may be lower or higher than quoted. For the most recent month-end performance, visit [www.PrincipalAM.com/mutual](http://www.PrincipalAM.com/mutual).**

<sup>7</sup> Performance assumes reinvestment of all dividends and capital gains.

<sup>8</sup> MSCI World Ex-U.S. Small Cap Index is a free float-adjusted market capitalization index that is designed to measure the combined equity market performance of developed countries excluding the US.

<sup>9</sup> Index performance information reflects no deduction for fees, expenses, or taxes. Indices are unmanaged and individuals cannot invest directly in an index.

<sup>10</sup> Morningstar percentile rankings are based on total returns and do not reflect the inclusion of sales charges. If sales charges were reflected, rankings could be lower.

<sup>11</sup> The Morningstar Rating™ for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Morningstar ratings do not reflect the inclusion of sales charges. If sales charges were reflected, ratings could be lower.

<sup>12</sup> Class I shares were first sold 12/31/2014. Returns for Class I shares prior to 12/31/2014, including since inception performance, are based on performance of the Class A shares adjusted to reflect the fees and expenses of Class I shares. Class A shares were first sold 06/11/2014.

<sup>13</sup> The net expense ratio reflects contractual expense limits, if any, which may lower net expenses and cause the gross and net expense ratios to differ. In such cases a date is listed through which expense limits are expected to apply; however, Principal Funds and the investment adviser may mutually agree to terminate the expense limits prior to the end of the period. Returns displayed are based on net total investment expense.

Returns shown for periods of less than one year are not annualized.

International and global investing involves greater risks such as currency fluctuations, political/social instability and differing accounting standards. Risk is magnified in emerging markets, which may lack established legal, political, business or social structures to support securities markets. Small cap stocks may have additional risks including greater price volatility.

Class I shares are available only to eligible investors, including various institutional investors and investors in certain mutual fund wrap or asset allocation programs. See the prospectus for eligibility requirements.

**Carefully consider a fund's objectives, risks, charges, and expenses. Contact your financial professional or visit [www.PrincipalAM.com](http://www.PrincipalAM.com) for a prospectus, or summary prospectus if available, containing this and other information. Please read it carefully before investing.**

Investing involves risk, including possible loss of principal.
