# Principal Inflation Protection ETF (RIZE)

Second quarter 2026

## Fund overview

The Fund seeks to provide current income and, as a secondary objective, capital appreciation during periods of rising U.S. inflation.

## Trading information

**Symbol** **CUSIP**

<sup>\*1</sup> Weighted average of the underlying securities in the portfolio.

<sup>\*2</sup> Turnover is calculated semi-annually; reflects most recent available calculation.

## An active, outcome-oriented strategy built for rising inflation environments

- A dynamic approach centered on U.S. TIPS with futures used to neutralize duration.
- Designed to capitalize on sustained upward movements in U.S. inflation.
- An experienced team leveraging a global platform that has offered inflation-protection solutions since 2018.

## RIZE: An inflation-focused strategy within the broader Principal<sup>®</sup> Fit ETF Suite

Positioning within various interest rate, credit, and inflation environments

For illustrative purposes only and reflects assumptions used in portfolio construction. The strategy may not perform as intended. Principal<sup>®</sup> Fit ETF Suite is a group of five fixed income ETFs created by Principal that can be used separately or in a combined allocation. The chart plots the market conditions that each of these five Principal ETFs was designed to navigate. ETF tickers within the Principal<sup>®</sup> Fit ETF Suite: DWWN, IG, RIZE, UUPP, WDE.

## Why allocate to a portfolio:

- To capitalize on an inflation outlook through an actively managed approach.
- To isolate and capture real yield and potentially minimize volatility tied to duration.
- To build a more stable return profile during environments where nominal yields are rising due to higher inflation expectations and rising real yields.

Top 5 holdings<sup>\*3</sup>

|                             | % of net assets |
|-----------------------------|-----------------|
| TSY INFL IX N/B 10/30 1.125 | 6.5             |
| TSY INFL IX N/B 04/30 1.625 | 6.4             |
| TSY INFL IX N/B 04/28 1.25  | 6.0             |
| TSY INFL IX N/B 10/27 1.625 | 5.7             |
| TSY INFL IX N/B 10/29 1.625 | 5.6             |
| Total in Top 5              | 30.2%           |

Sector allocation (%)<sup>\*4</sup>

<sup>\*4</sup> Source: Aladdin® by BlackRock®, Fund holdings and allocations shown are unaudited and may not be representative of current or future investments. Percentages may not add up to 100% due to rounding and/or inclusion or exclusion of cash.

Credit quality allocation (%)<sup>\*4,\*5</sup>

<sup>\*5</sup> Represents the middle rating of Moody's, S&P, and Fitch. When only two agencies rate a bond, the lower is used. When only one agency rates a bond, that rating is used. The ratings are an indication of an issuer's creditworthiness and typically range from AAA or Aaa (highest) to D (lowest). The NR category consists of rateable securities that have not been rated by a Nationally Recognized Statistical Rating Organization.

Performance

| Total returns (%)                                               |         |              |        |        |        |         |                             | Yields (%)                              |                                                    |                                  |

Performance data quoted represents past performance. Past performance is no guarantee of future results and investment returns, and principal value of the Fund will fluctuate so that shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. Visit [www.PrincipalAM.com/ETF](http://www.PrincipalAM.com/ETF) for current month-end performance.

<sup>\*6</sup> The net expense ratio reflects contractual expense limits, if any, which may lower net expenses and cause the gross and net expense ratios to differ. In such cases a date is listed through which expense limits are expected to apply; however, Principal Exchange-Traded Funds and the investment adviser may mutually agree to terminate the expense limits prior to the end of the period. Returns displayed are based on net total investment expense.

<sup>\*7</sup> 30-Day SEC yield represents net investment income earned by a fund over a 30-day period, stated as an annual percentage. Unsubsidized yield reflects the SEC yield when some fund expenses are not waived. Subsidized yield reflects a fund's yield when all expense waivers are included.

<sup>\*8</sup> As of July 1, 2026. The distribution yield is calculated by annualizing actual dividends distributed for the dividend period (monthly, quarterly, etc.) ending on the most recent dividend distribution date and dividing by the net asset value for the same date. The yield does not include long- or short-term capital gains distributions.

<sup>\*9</sup> The Bloomberg U.S. Treasury TIPS 0-5 Years Index (Series-L) measures the performance of the U.S. Treasury Inflation Protected Securities (TIPS) with 0-5 year maturities.

<sup>\*10</sup> Index performance information reflects no deduction for fees, expenses, or taxes. Indices are unmanaged and individuals cannot invest directly in an index.

**Duration:** The sensitivity of a fixed-income investment's principal value to interest rate changes. **Yield to maturity:** Rate of return anticipated on a bond if held until maturity. **Standard deviation:** Measures how widely portfolio returns have varied.

Returns shown for periods of less than one year are not annualized.

**Risks:** Asset allocation and diversification do not ensure a profit or protect against a loss. Investing in ETFs involves risk, including possible loss of principal. ETFs are subject to risk similar to those of stocks, including those regarding short-selling and margin account maintenance. Investor shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Ordinary brokerage commissions apply.

Fixed-income investments are subject to interest rate risk; as interest rates rise their value will decline. Neither the principal of bond investment options nor their yields are guaranteed by the U.S. government. Certain components of the fund's current yield are adjusted monthly based on changes in the rate of inflation. This can cause the yield to vary from one month to the next and may not be repeated. Investing in derivatives entails specific risks relating to liquidity, leverage, and credit, which may reduce returns and/or increase volatility.

**Not authorized for distribution unless preceded or accompanied by a current prospectus, or a summary prospectus if available, that includes information about the fund's objectives, risks, charges, and expenses. Please read it carefully before investing.**
