

Principal Global High Yield

31 March 2025

Strategy description

The strategy that is primarily invested in U.S. and European domiciled companies and is focused on income and capital appreciation derived primarily from security selection.

Strategy facts

Manager: Principal Fixed Income

Inception: 1 January 2010

Index: Global High Yield Blended Index

Available vehicles¹: IMA, U.S. Mutual Fund

Targeted number of issuers²: 150-225

Expected turnover²: 30-50%

Key differentiators

- **Incorporation of proprietary data science tools and Environmental, Social, and Corporate Governance (ESG) metrics** helps challenge biases and seeks to avoid unintended risk.
- **Well-defined exit strategies to help minimize risk;** dynamic risk limits allow flexibility to adjust risk tolerance as market volatility and our macro risk perspective changes.
- **Seeks to achieve long-term outperformance** and drawdown mitigation.

⁴Yields and yield related characteristics shown are only one component of performance or expected performance and are not and should not be viewed as a statement of the current or future performance of the strategy. See the gross and net performance of the strategy.

⁵Not based on ratings of one rating agency. More information regarding the averaging methodology and quality distribution is available upon request. Quality allocation shown is based on ratings from S&P, Moody's, and Fitch. The Not Rated category consists of rateable securities that have not been rated by a nationally recognized statistical rating organization. AAA includes cash. Due to rounding, figures and percentages shown may not add to the total or equal 100%.

The index benchmarks are referred to for comparative purposes only and are not necessarily intended to parallel the risk or investment approach of the portfolios included in the composites and the methods of calculating performance of the composite and the index may not be identical.

Investment process overview

A dynamic, time-tested, and consistent process combining macro perspective with fundamental research and analysis.

Fundamentals, Technicals, Valuations (FTV) framework instills a consistent research approach to identifying best risk/return opportunities

Independent forward-looking ratings on all invested issuers

Well-defined exit strategies help minimize capital losses

Past performance is no guarantee of future results. Investing involves risk, including possible loss of principal. Fixed Income investments are subject to interest rate risk; when interest rates rise, the price of debt typically declines. Lower-rated securities are subject to additional credit and default risks. International and global investing involves greater risks such as currency fluctuations, political/social instability and differing accounting standards. There can be no assurance that the strategy's objectives of downside risk reduction/protection will be achieved.

This material covers general information only and does not take account of any investor's investment objectives or financial situation and should not be construed as specific investment advice, a recommendation, or be relied on in any way as a guarantee, promise, forecast or prediction of future events regarding an investment or the markets in general. The opinions and predictions expressed are subject to change without prior notice. The information presented has been derived from sources believed to be accurate; however, we do not independently verify or guarantee its accuracy or validity. Any reference to a specific investment or security does not constitute a recommendation to buy, sell, or hold such investment or security, nor an indication that the investment manager or its affiliates has recommended a specific security for any client account. Subject to any contrary provisions of applicable law, the investment manager and its affiliates, and their officers, directors, employees, agents, disclaim any express or implied warranty of reliability or accuracy and any responsibility arising in any way (including by reason of negligence) for errors or omissions in the information or data provided.

All figures shown in this document are in U.S. dollars unless otherwise noted.

Indices are unmanaged and do not take into account fees, expenses and transaction costs are not available for direct investment.

The ICE BofA Global High Yield Hedged to USD Index is the hedged version of the ICE BofA Global High Yield Index. The index tracks the performance of USD, CAD, GBP, and EUR denominated below investment grade corporate debt publicly issued in the major domestic and Eurobond market. Qualifying securities must have a below investment grade rating (based on the average of Moody's, S&P, and Fitch). In addition, qualifying securities must have an investment grade rated country of risk (based on an average of Moody's, S&P, and Fitch foreign currency long term sovereign debt ratings), at least one year remaining term to final maturity, a fixed coupon schedule and a minimum amount outstanding of USD 100 million, EUR 100 million, GBP 50 million, or CAF 100 million. In reports issued prior to 1 January 2015 the ICE BofA Global High Yield Index was used for comparison purposes. The benchmark was changed to be more representative of the composite strategy. Information regarding the comparison to the ICE BOFA Global High Yield Hedged to USD Index is available upon request.

****Prior to 1 January 2015 the benchmark used for comparison purposes for the Global High Yield strategy is the BofAML Global High Yield Index. On 1 January 2015 the strategy benchmark was changed to the ICE BofAML Global High Yield USD Hedged Index.**

Composite performance results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Gross performance shown does not reflect the deduction of investment management fees and certain transaction costs, which will reduce portfolio performance. Net performance results reflect a reduction for investment advisory fees based on the firm's applicable asset management fee schedule. Effective March 2021, composite net performance is calculated using the highest applicable fee as shown in the composite fee schedule. Prior to March 2021, composite net returns were derived based the aggregation of underlying portfolios net returns that were either calculated by applying actual client fees for non-affiliated clients or a model tiered fee schedule for affiliated clients, unless otherwise noted. Composite net returns after January 1, 2011, are inclusive of performance-based fees (where applicable). Performance-based fees are accounted for on a cash basis. Prior to January 2003 certain commingled funds which returns may be utilized in a Composite's performance track record had net returns that reflected a deduction for administrative fees in addition to direct trading expenses and investment management fees. Therefore, the average fees will be higher during these time periods.

Each portfolio included in the composite is managed according to its own individual investment restrictions and limitations and therefore their characteristics may vary from those of the Representative Portfolio shown. Portfolio performance, characteristics and volatility may differ from the benchmark shown. Holdings and weightings are subject to change daily.
