Investment objective

The Fund seeks to provide an income return consistent with capital preservation. The Fund seeks to achieve its objective by investing primarily in a portfolio of U.S. dollar denominated preferred securities and debt securities. At the time of the Fund's investment the majority of these securities will be rated as investment grade. Any exposure to currencies other than US dollar will be hedged back to US dollars.

Cumulative performance since inception (%)**Fund analysis**

	Fund	Index
Average Credit Quality	Baa2	A3
Current Yield	6.0	4.7
Yield to Worst	5.8	5.1
Yield to Maturity	7.1	5.1
Modified Duration	4.4	6.4

Any yields quoted on the fact sheet are calculated at portfolio level gross of tax and expenses.

- Current Yield is the annual interest earned on the underlying bonds divided by the market price of the underlying portfolio of bonds. The figure is not the dividend yield received by the investors and is subject to change depending on the underlying portfolio of bonds.
- Yield to Worst is the lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making the worst-case scenario assumptions on the issue.
- Yield to Maturity is a concept used to determine the rate of return an investor will receive if a long-term, interest-bearing investment, such as a bond, is held to its maturity date. Please note that this is not the return or dividend to be received by investors in the fund.

Credit Quality refers to the credit ratings for the underlying securities in the Fund as rated by Standard & Poor's or Moody's Investors Service, and typically range from AAA/Aaa (highest) to C/D (lowest). If Moody's and S&P assign different ratings, the higher rating is used. Ratings methodologies and individual ratings can change over time.
