

Principal U.S. Small Cap Equity

30 June 2024

Strategy description

The strategy aims to provide long-term capital growth by investing primarily in the shares of small-cap companies domiciled in the United States. The strategy is research-driven and focused on bottom-up stock selection, not bold calls on macro or geopolitical conditions.

Key differentiators

- **We invest in businesses we believe are becoming better** as a result of positive change: innovators, renovators, and pacesetters.
- **We identify them ahead of the market** by recognizing potential underappreciated growth and improvement opportunities.
- **We isolate stock selection as the key driver of results**, delivering style consistency over time using a comprehensive system of checks and balances.

Investment philosophy

We believe bottom-up stock selection is the most reliable and repeatable source of consistent performance. We also recognize that persistent behavioral biases and impediments to capital flows create market inefficiencies and opportunities. We seek to exploit these anomalies through focused fundamental research and disciplined risk management.

As of June 2024. Investing involves risk, including possible loss of principal. Periods over one year are annualized. Please see disclosures for additional information on performance.

Risk Considerations

- The potential for profit is accompanied by the possibility of loss.
- Equity markets are subject to many factors, including economic conditions, government regulations, market sentiment, local and international political events, and environmental and technological issues that may impact return and volatility.
- There is a risk that an investment will decline in value.
- Equity stocks of small-cap companies carry greater risks including that they may be more volatile and less liquid than equity stocks of larger, more established companies.

Composite performance results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Gross performance shown does not reflect the deduction of investment management fees and certain transaction costs, which will reduce portfolio performance. Net performance results reflect a reduction for investment advisory fees based on the firm's applicable asset management fee schedule. Effective March 2021, composite net performance is calculated using the highest applicable fee as shown in the composite fee schedule. Prior to March 2021, composite net returns were derived based the aggregation of underlying portfolios net returns that were either calculated by applying actual client fees for non-affiliated clients or a model tiered fee schedule for affiliated clients, unless otherwise noted. Composite net returns after January 1, 2011, are inclusive of performance-based fees (where applicable). Performance-based fees are accounted for on a cash basis. Prior to January 2003 certain commingled funds which returns may be utilized in a Composite's performance track record had net returns that reflected a deduction for administrative fees in addition to direct trading expenses and investment management fees. Therefore, the average fees will be higher during these time periods.

Each portfolio included in the composite is managed according to its own individual investment restrictions and limitations and therefore their characteristics may vary from those of the Representative Portfolio shown. Portfolio performance, characteristics and volatility may differ from the benchmark shown. Holdings and weightings are subject to change daily. The holdings listed should not be considered a recommendation to purchase or sell any security and there is no assurance an investment in these securities will be profitable.
