Fund information

	Fund
Fund AUM	\$3.0B
Number of holdings	1,520
Weighted average duration	4.3
Standard deviation (3-year)	7.5

Source: FactSet

Duration: The sensitivity of the value of principal of a fixed-income investment to interest rate changes.

Standard deviation: Measures how widely portfolio returns have varied.

Reported FactSet data is subject to revision over time, which may result in slight differences among data points reported during the same period.

Increase diversification and yield potential

- Open architecture approach combines multiple credit sectors and active, third-party and proprietary managers.
- Global, diversified opportunity set may offer more attractive income and total return potential than traditional core fixed income.
- Risk-aware portfolio construction incorporates macroeconomic insights with robust holdings-based risk analysis.

Credit quality allocation (%)^{1,2}

¹ Credit quality refers to the credit ratings for the underlying securities in the Fund (fixed income portion of the portfolio) as rated by S&P's and/or Moody's Investors Service. The ratings are an indication of an issuer's credit worthiness and typically range from AAA/Aaa (highest) to C/D (lowest). If Moody's and/or S&P assign different ratings, the highest of the two ratings is used. The NR category consists of rateable securities that have not been rated by the noted Nationally Recognized Statistical Rating Organizations.

Regional allocation (%)²

² Source FactSet. Fund holdings and allocations shown are unaudited and may not be representative of current or future investments. Percentages may not add up to 100% due to rounding and/or inclusion or exclusion of cash.

Morningstar percentile rankings are based on total returns. Morningstar ratings are based on risk-adjusted returns.

Returns represent past performance and do not guarantee future results. Share price, principal value, and return will vary and you may have a gain or loss when shares are sold. Current performance may be lower or higher than quoted. For the most recent month-end performance, visit www.PrincipalAM.com/mutual.

* The index yields are the average of the monthly yields over the last ten years. Average monthly yields are representative of the following indices: High yield, BBG US HY 2% Issuer Cap; CMBS, BBG US CMBS 2.0 Baa; Emerging market debt, JPM EMBI Global Diversified; Preferred and capital securities, ICE BofA US All Capital Securities; Investment-grade credit, BBG US Corporate Investment Grade; Floating rate debt, S&P/LSTA Leveraged Loan; Government debt, BBG US Treasury 3-10 Yr.

³ Performance assumes reinvestment of all dividends and capital gains.

⁴ DI Blended Index (Linked) composition: March 1, 2022 and after, 100% Bloomberg U.S. Aggregate Index (covers the U.S. investment-grade fixed rate bond market and represents securities that are domestic, taxable, and dollar denominated), for the period prior to March 1, 2022, 80% Bloomberg Global Aggregate Index (a broad-based measure of global investment-grade fixed income) and 20% MSCI World Value Index NTR (includes large- and mid-cap securities across developed markets that exhibit overall value style), and for the period prior to January 1, 2019, 40% Bloomberg Global Credit Index (represents global investment-grade, fixed-rate, taxable corporate and government-related bonds), 30% Bloomberg Global High Yield Index (represents the global high yield bond market), and 30% MSCI ACWI Value Index NTR (a market cap weighted index that is a broad measure of global equity-markets). Net Total Return (NTR) includes dividends after the deduction of withholding taxes.

⁵ Index performance information reflects no deduction for fees, expenses, or taxes. Indices are unmanaged and individuals cannot invest directly in an index.

⁶ Morningstar percentile rankings are based on total returns and do not reflect the inclusion of sales charges. If sales charges were reflected, rankings could be lower.

⁷ The Morningstar Rating™ for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Morningstar ratings do not reflect the inclusion of sales charges. If sales charges were reflected, ratings could be lower.

© 2023 Morningstar, Inc. All rights reserved. Part of the mutual fund data contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete, or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information.

⁸ The net expense ratio reflects contractual expense limits, if any, which may lower net expenses and cause the gross and net expense ratios to differ. In such cases a date is listed through which expense limits are expected to apply; however, Principal Funds

and the investment adviser may mutually agree to terminate the expense limits prior to the end of the period. Returns displayed are based on net total investment expense.

⁹ 30-Day SEC yield represents net investment income earned by a fund over a 30-day period, stated as an annual percentage. Unsubsidized yield reflects the SEC yield when some fund expenses are not waived. Subsidized yield reflects a fund's yield when all expense waivers are included. 12-month yield is based on actual distributions paid over a trailing 12-month period, stated as an annual percentage.

Returns shown for periods of less than one year are not annualized.

Asset allocation and diversification do not ensure a profit or protect against a loss. Fixed-income investments are subject to interest rate risk; as interest rates rise their value will decline. The U.S. government does not guarantee the principal or coupon payments of non-U.S. Treasury bonds. Investments in natural resource industries can be affected by disease, embargoes, international/political/economic developments, variations in the commodities markets/weather and other factors. Investing in derivatives entails specific risks regarding liquidity, leverage and credit that may reduce returns and/or increase volatility.

Class I shares are available only to eligible investors, including various institutional investors and investors in certain mutual wrap or asset allocation programs. See the prospectus for eligibility requirements.

Principal Global Equities, Principal Global Fixed Income, and Finisterra Capital are specialized investment management groups of Principal Global Investors, the investment adviser to Principal Funds. Principal Global Investors leads global asset management at Principal®.
