

# Principal Small-MidCap Dividend Income Fund

First quarter 2023

## Fund overview

The Fund seeks a relatively high level of current income along with long-term growth of income and capital appreciation by investing primarily in dividend paying stocks of U.S. small- and mid-cap companies.

## Ticker

Class I: PMDIX    Class C: PMDDX  
Class A: PMDAX    Class R6: PMDHX

## Fund information

	Fund	Index
Fund AUM	\$1.2B	—
Number of holdings	70	1,795
Active share	91.8%	—
Market Cap <sup>1</sup>	\$7.9B	\$6.4B
Turnover <sup>2</sup>	22.1%	—
Sharpe ratio (3-year)	1.0	1.0

Source: FactSet and Morningstar

<sup>1</sup> Weighted average

<sup>2</sup> Turnover is calculated semi-annually; reflects most recent available calculation.

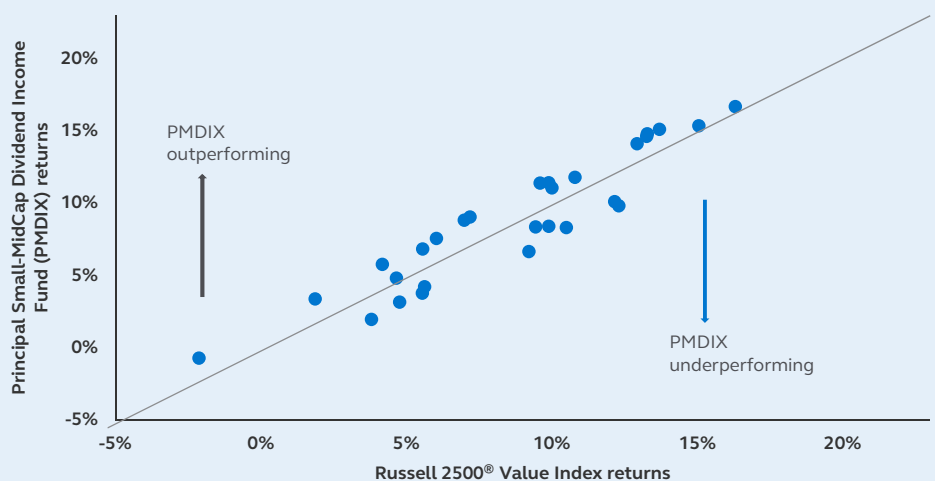

**Active share:** Measures how much different portfolio weights in securities are from benchmark weights. The higher the active share, the more the portfolio differs from the benchmark. **Sharpe ratio:** Measures how an investment balances risks and rewards. The higher the Sharpe ratio, the better the investment's historical risk-adjusted performance.

Reported FactSet data is subject to revision over time, which may result in slight differences among data points reported during the same period.

## Dividends are the hallmark of great companies

- **Growers, not just payers.** Dividend growers and payers have historically had higher returns with less risk than non-dividend paying stocks.<sup>3</sup>
- **Powered by great companies.** A quality-first mentality removes subpar operators, helping to avoid value traps.
- **Sector neutral to help mitigate risk.** We are focused on selecting great companies, not timing sectors.

## Performance versus the index Rolling 5-year return, plotted quarterly

Since inception: 06/06/2011 - 03/31/2023

Source: Morningstar

The diagonal line represents zero excess returns (where the fund and index returns are equal). Data points above the line represent outperformance of the fund vs. the index. Data points below the line represent underperformance of the fund vs. the index.

## Why allocate to a portfolio:

- **Dividends matter.** Dividends help provide downside risk mitigation and are an important part of total return, especially in low growth environments.
- **Quality is market cycle tested.** Companies with competitive advantages, strong management teams, and a commitment to shareholder returns have proven resilient when market cycles transition.
- **Access to well-managed companies.** Small- and mid-size companies may offer historically greater growth potential than large cap companies and provide additional diversification, which helps to manage risk.

Returns represent past performance and do not guarantee future results. Share price, principal value, and return will vary and you may have a gain or loss when shares are sold. Current performance may be lower or higher than quoted. For the most recent month-end performance, visit [www.PrincipalAM.com/mutual](http://www.PrincipalAM.com/mutual).

<sup>6</sup> Performance assumes reinvestment of all dividends and capital gains.

<sup>7</sup> Russell 2500® Value Index measures the performance of those Russell 2500® companies with lower price-to-book ratios and lower forecasted growth values.

<sup>8</sup> Index performance information reflects no deduction for fees, expenses, or taxes. Indices are unmanaged and individuals cannot invest directly in an index.

<sup>9</sup> Morningstar percentile rankings are based on total returns and do not reflect the inclusion of sales charges. If sales charges were reflected, rankings could be lower.

<sup>10</sup> The Morningstar Rating™ for funds, or "star rating," is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Morningstar ratings do not reflect the inclusion of sales charges. If sales charges were reflected, ratings could be lower.

Part of the mutual fund data contained herein: (1) is proprietary to Morningstar and/or its content providers; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete, or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information.

<sup>11</sup> The net expense ratio reflects contractual expense limits, if any, which may lower net expenses and cause the gross and net expense ratios to differ. In such cases a date is listed through which expense limits are expected to apply; however, Principal Funds and the investment adviser may mutually agree to terminate the expense limits prior to the end of the period. Returns displayed are based on net total investment expense.

<sup>12</sup> 30-Day SEC yield represents net investment income earned by a fund over a 30-day period, stated as an annual percentage. Unsubsidized yield reflects the SEC yield when some fund expenses are not waived. Subsidized yield reflects a fund's yield when all expense waivers are included. 12-month yield is based on actual distributions paid over a trailing 12-month period, stated as an annual percentage.

Returns shown for periods of less than one year are not annualized.

Equity investments involve greater risk, including heightened volatility, than fixed-income investments. Small and mid-cap stocks may have additional risks, including greater price volatility.

Companies may at any time choose not to pay a dividend, or dividends paid may be less than anticipated.

Class I shares are available only to eligible investors, including various institutional investors and investors in certain mutual fund wrap or asset allocation programs. See the prospectus for eligibility requirements.

**Not authorized for distribution unless preceded or accompanied by a current prospectus, or a summary prospectus if available, that includes information about the Fund's objectives, risks, charges and expenses. Please read it carefully before investing.**

Investing involves risk, including possible loss of principal.
