Investment objective

The investment objective of the Fund is to seek to generate total returns through income and capital appreciation, while limiting volatility and potential capital losses. The Fund has an unconstrained, long-bias and seeks to achieve its objective by investing across the spectrum of the emerging market debt universe including bonds, interest rates, currencies and credit default swaps. The Fund aims to deliver a flexible "all weather" strategy designed to deliver an optimal yield—liquidity—volatility profile throughout the market cycle.

Average Maturity (Years)	7.0
Gross Exposure (%)	148.5
Net Exposure (%)	76.8
Current Yield	6.6
Yield to Worst	9.0
Yield to Maturity	9.2

Any yields quoted on the fact sheet are calculated at portfolio level gross of tax and expenses.

- Current Yield is the annual interest earned on the underlying bonds divided by the market price of the underlying portfolio of bonds. The figure is not the dividend yield received by the investors and is subject to change depending on the underlying portfolio of bonds.
- Yield to Worst is the lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making the worst-case scenario assumptions on the issue.
- Yield to Maturity is a concept used to determine the rate of return an investor will receive if a long-term, interest-bearing investment, such as a bond, is held to its maturity date. Please note that this is not the return or dividend to be received by investors in the fund.
