

# Principal Diversified Real Asset CIT

Second quarter 2025

## Fund overview

A multi-asset, multi-manager portfolio designed to protect purchasing power by seeking long-term total return in excess of inflation. The CIT's strategy of investing across a universe of real assets offers the potential for enhanced returns and reduced risk relative to a traditional portfolio.

**Duration:** The sensitivity of the value of principal of a fixed-income investment to interest rate changes.

**Sharpe ratio:** Measures how an investment balances risks and rewards. The higher the Sharpe ratio, the better the investment's historical risk-adjusted performance. **Standard deviation:** Measures how widely portfolio returns have varied.

Reported FactSet data is subject to revision over time, which may result in slight differences among data points reported during the same period.

## Dynamic real asset exposure, balanced risk profile, more consistent outcome

- Strategically allocate among real return and real asset securities, beyond TIPS, commodities, and REITs.
- Blends multiple strategies to help mitigate undesired risk; designed to offer real return with lower-than-market volatility.
- Specialist managers within each asset class exploit opportunities and deliver a more consistent real asset outcome.

The information shown is the representative portfolio of our Diversified Real Asset strategy. May not reflect current allocations of investment managers. Percentages may not add up to 100% due to rounding. \*Delaware Investments Fund Advisers, a series of Macquarie Investment Management Business Trust. \*Wellington Management Company LLP is a SEC-registered investment advisor and an independent and unaffiliated investment manager to Principal Funds. A Tactical asset allocation sleeve was added in the fourth quarter of 2023. At times, there may not be any tactical views reflected through this sleeve, so allocations may be zero.

## Why allocate to a portfolio:

- **Protect purchasing power:** The value of real assets or their income tends to rise with inflation, they can be more responsive than traditional assets
- **Diversification:** Real assets have exhibited modest correlation and little overlap with a traditional stock and bond portfolio
- **Enhance total return potential:** Valuations of the real asset equity universe are more attractive compared with the current valuations in the broad equity market

## Real assets have historically delivered resilient returns during periods of higher inflation

<sup>(3)</sup>The Morningstar Rating<sup>™</sup> for funds, or “star rating,” is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product’s monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods. Morningstar ratings do not reflect the inclusion of sales charges. If sales charges were reflected, ratings could be lower. © 2025 Morningstar, Inc. All rights reserved. Returns displayed are based on net total investment expense. The Principal Diversified Real Asset Collective Investment Trust (CIT) is a collective investment trust maintained by Principal Global Investors Trust Company (the Trust Company). The Trust Company has retained Principal Global Investors LLC (the Advisor), to serve as investment advisor with respect to the CIT, subject to the Trust Company’s supervision and review. The Advisor is an indirect wholly owned subsidiary of Principal Financial Group, Inc., and is under common control with the Trust Company. The CIT is available only to certain qualified retirement plans and

governmental 457(b) plans.

Performance assumes reinvestment of all dividends and capital gains.

Investing involves risk, including possible loss of principal.

Returns shown for periods of less than one year are not annualized.

Asset allocation and diversification do not ensure a profit or protect against a loss.

Infrastructure companies are subject to risk factors including high interest costs, regulation costs, economic slowdown, and energy conservation policies. REITs are subject to declines in real estate values, risks to physical property, and instability/creditworthiness of management. Investment in natural resource industries and commodity related derivatives can be affected by political/economic developments, market shocks/natural disasters, and other factors. TIPS are subject to interest rate risk and may be unsuccessful at mitigating inflation. Floating rate debt instruments are subject to credit risk, interest rate risk, and impaired collateral risk, which means that the value of the collateral used to secure a loan held by the fund could decline over the course of the loan.

The CIT is not a mutual fund and is not registered with the Securities and Exchange Commission, the State of Oregon, or any other regulatory body. Units of the CIT are not deposits or obligations of, guaranteed by, or insured by the Trust Company or any affiliate, and are not insured by the FDIC or any other federal or state government agency. The value of the CIT will fluctuate so that when redeemed, units may be worth more or less than the original cost. The Declaration of Trust, Participation Agreement, and disclosure documents contain important information about investment objectives, risks, fees, and expenses associated with investment in the CIT and should be read carefully before investing. The Declaration of Trust is available at [principal.com](https://principal.com). A copy of the Participation Agreement can be obtained from your plan administrator. The Trust and Participation Agreement contain important information about Trust fees and investment objectives, risks, and expenses of the underlying investments in the Collective Investment Funds managed by Principal Trust and should be read carefully before investing.
