

Principal Aligned Blue Chip Equity

31 March 2025

Strategy description

The strategy invests for the long-term in high-quality companies led by owner-operators and uses a highly active approach to U.S. large-cap equities that aims for long-term outperformance with less risk.

Strategy facts

Manager: Principal Aligned

Inception: 1 July 2012

Index: Russell 1000 Growth Index

Targeted number of holdings¹: 35-55

Expected turnover¹: 15-30%

Key differentiators

- A wide latitude to depart from index weights results in **higher active share and more concentrated top holdings than peers.**
- **Aligned incentives:** Owner-operators tend to be passionate and cost conscious. We believe they have longer-term outlooks and are better capital allocators.
- **An experienced team** with a history of delivering excess risk-adjusted returns over market cycles.

Portfolio management

K. William Nolin, CFA

36 years' experience

Thomas Rozycki, CFA

Investment philosophy

We are long-term, completely fundamental investors. We invest in owner-operator management teams and companies we believe have sustainable competitive advantages. We're constantly focused on valuation and reducing risk.

As of March 2025. Investing involves risk, including possible loss of principal. Periods over one year are annualized. Please see disclosures for additional information on performance.

Risk Considerations

- The potential for profit is accompanied by the possibility of loss.
- Equity markets are subject to many factors, including economic conditions, government regulations, market sentiment, local and international political events, and environmental and technological issues that may impact return and volatility.
- There is a risk that an investment will decline in value.

High-quality companies led by owner-operators

High-quality businesses

with a sustainable competitive advantage

Businesses with **owner-operator** management or culture

This material covers general information only and does not take account of any investor's investment objectives or financial situation and should not be construed as specific investment advice, a recommendation, or be relied on in any way as a guarantee, promise, forecast or prediction of future events regarding an investment or the markets in general. The opinions and predictions expressed are subject to change without prior notice. The information presented has been derived from sources believed to be accurate; however, we do not independently verify or guarantee its accuracy or validity. Any reference to a specific investment or security does not constitute a recommendation to buy, sell, or hold such investment or security, nor an indication that the investment manager or its affiliates has recommended a specific security for any client account. Subject to any contrary provisions of applicable law, the investment manager and its affiliates, and their officers, directors, employees, agents, disclaim any express or implied warranty of reliability or accuracy and any responsibility arising in any way (including by reason of negligence) for errors or omissions in the information or data provided.

All figures shown in this document are in U.S. dollars unless otherwise noted.

Indices are unmanaged and do not take into account fees, expenses and transaction costs are not available for direct investment.

The Russell 1000 Growth Index measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. Information regarding the comparison to the Russell 1000 Growth Index is available upon request. Russell Investment Group is the source and owner of the trademarks, service marks & copyrights related to the Russell indexes. Russell® is a trademark of Russell Investment Group.

Composite performance results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Gross performance shown does not reflect the deduction of investment management fees and certain transaction costs, which will reduce portfolio performance. Net performance results reflect a reduction for investment advisory fees based on the firm's applicable asset management fee schedule. Effective March 2021, composite net performance is calculated using the highest applicable fee as shown in the composite fee schedule. Prior to March 2021, composite net returns were derived based on the aggregation of underlying portfolios net returns that were either calculated by applying actual client fees for non-affiliated clients or a model tiered fee schedule for affiliated clients, unless otherwise noted. Composite net returns after January 1, 2011, are inclusive of performance-based fees (where applicable). Performance-based fees are accounted for on a cash basis. Prior to January 2003 certain commingled funds which returns may be utilized in a Composite's performance track record had net returns that reflected a deduction for administrative fees in addition to direct trading expenses and investment management fees. Therefore, the average fees will be higher during these time periods.

Each portfolio included in the composite is managed according to its own individual investment restrictions and limitations and therefore their characteristics may vary from those of the Representative Portfolio shown. Portfolio performance, characteristics and volatility may differ from the benchmark shown. Holdings and weightings are subject to change daily. The holdings listed should not be considered a recommendation to purchase or sell any security and there is no assurance an investment in these securities will be profitable.
