Total	21.0

See disclosure section for additional details.

A high-conviction, long-term approach to core bond investing

- Long-term investment horizon allows a value approach that seeks to capture total return over a full market cycle.
- A research-driven, low-turnover strategy focused on bonds with a margin of safety.*
- Preference for bonds with asymmetric risk profiles.

Long horizon sector allocations

Diversified sector allocations and security selections, with an emphasis on issuers with a margin of safety.

		Typical allocation ranges	Potential benefit
Core	High-quality corporate credit	50-70%	Earn credit spread from companies with a margin of safety
Diversifier/Liquidity	Agency MBS-passthroughs	15-25%	Provides liquidity to the portfolio, a spread advantage over U.S. Treasuries and has a low correlation to corporate credit
	U.S. Treasuries	10-20%	Provides liquidity to the portfolio and acts as risk diversifier against corporate credits

Source: Principal Global Investors. Allocations and investment guidelines are subject to change and may not reflect current holdings.

Why allocate to a portfolio:

- Concentrated portfolio with 40-60 issues that include compelling and diversified fixed income allocations, such as Investment Grade Credit, Mortgage-Backed Securities, and U.S. Treasuries.
- Cost-effective access to active management by a tenured portfolio management team that has been managing the composite strategy since 2005.
- Strategic bias toward corporate bonds, which have historically offered more return potential and less interest rate sensitivity than Treasuries.

*Biased towards issuers with stable cash flows, hard assets, limited ongoing capital needs, and that benefit from demographic trends.

Periods over one year are annualized. Net of fees reflects the gross returns reduced by an assumed maximum bundled fee of 2.25%. Beginning September 1, 2021, performance results reflect actual returns of the SMA wrap-fee composite. Prior to September 1, 2021, performance reflects the Principal Fixed Income Core Fixed Income institutional composite and did not reflect any actual SMA portfolios. See disclosure section for additional details.

⁴ The index is the Bloomberg U.S. Aggregate Index and is described below.

⁵ Portfolio information is based on the strategy's model portfolio.

⁶ Represents the middle rating of Moody's, S&P, and Fitch. When only two agencies rate a bond, the lower is used. When only one agency rates a bond, that rating is used. The ratings are an indication of an issuer's creditworthiness and typically range from AAA or Aaa (highest) to D (lowest). The NR category consists of rateable securities that have not been rated by a Nationally Recognized Statistical Rating Organization.

⁷ Capture ratios: Shows the relationship of the composite's performance to the performance of an index during a specific timeframe, as a percentage of that index's positive (upside capture) and negative (downside capture) performance. Represents quarterly returns for both composite and index returns.

Past performance is no guarantee of future results. Investing involves risk, including possible loss of principal. Fixed Income investments are subject to interest rate risk; when interest rates rise, the price of debt typically declines. Potential investors should be aware that Investment grade corporate bonds carry credit risks, default risk, liquidity risks, currency risks, operational risks, legal risks, counterparty risk and valuation risks.

This material covers general information only and does not take account of any investor's investment objectives or financial situation and should not be construed as specific investment advice, a recommendation, or be relied on in any way as a guarantee, promise, forecast or prediction of future events regarding an investment or the markets in general.

The opinions and predictions expressed are subject to change without prior notice. The information presented has been derived from sources believed to be accurate; however, we do not independently verify or guarantee its accuracy or validity. Any reference to a specific investment or security does not constitute a recommendation to buy, sell, or hold such investment or security, nor an indication that the investment manager or its affiliates has recommended a specific security for any client account. Subject to any contrary provisions of applicable law, the investment manager and its affiliates, and their officers, directors, employees, agents, disclaim any express or implied warranty of reliability or accuracy and any responsibility arising in any way (including by reason of negligence) for errors or omissions in the information or data provided.

All figures shown in this document are in U.S. dollars unless otherwise noted.

Indices are unmanaged and do not take into account fees, expenses, and transaction costs. The methods of calculating performance of the composite and the index may not be identical and it is not possible to invest in an index.

The SMA Core Fixed Income (USD) composite contains all fully discretionary accounts that seek a high level of current income consistent with the preservation of capital by investing in U.S. Treasuries, Agency MBS and Investment Grade Corporate securities. The strategy seeks value by identifying long term opportunities. For comparison purposes, the benchmark is the Bloomberg U.S. Aggregate Index. The composite may consist of accounts from more than one SMA sponsor platform. The composite was created on August 01, 2021. The composite inception date is January 01, 1997.

The Bloomberg U.S. Aggregate Index represents securities that are SEC-registered, taxable, and dollar denominated. The index covers the U.S. investment grade fixed rate bond market, with index components including treasuries, government-related & corporate securities, MBS pass through securities, ABS, CMBS securities; must be at least one year to final maturity (ABS > remaining avg life of 1 year), must be rated investment grade or better, and must be publically issued

securities although 144A securities with registration rights are included. These major sectors are subdivided into more specific indices that are calculated and reported on a regular basis. The lower limit of par outstanding is \$250 million. Information regarding the comparison to the Bloomberg U.S. Aggregate Index is available upon request.

This strategy is only provided through separately managed accounts program sponsors. Clients should consult a financial professional before making any investment decisions. Financial professionals should consider the appropriateness of the manager, strategy and program for its clients on an initial and ongoing basis.

Wrap fee schedules are provided by independent wrap sponsors and are available upon request from the representative wrap sponsor. Actual returns will be reduced by investment advisory fees and other expenses that may be incurred in the management of the account. Net performance shown reflects the gross returns reduced by a maximum bundled fee which includes brokerage, custodial, and investment management expenses. Actual investment advisory fees incurred by clients may vary.

Actual client portfolios may differ because of account size, client-imposed investment restrictions, the timing of client investments and market, economic and individual company considerations.

Principal Global Investors (“PGI”) acts as a discretionary investment manager or nondiscretionary model provider in a variety of separately managed account or wrap fee programs (“SMA Program”) sponsored by either broker-dealers or another financial services firm (“Sponsor”). When acting as a discretionary investment manager, PGI is responsible for implementing trades in SMA Program accounts. When acting as a nondiscretionary model provider, PGI’s responsibility is limited to providing non-discretionary investment recommendations of model portfolios to the SMA Program Sponsor who may utilize such recommendations in connection with its management of SMA Program accounts. In such model SMA Programs (“Model Programs”), it is the Sponsor, and not PGI, which serves as the investment manager to, and has trade implementation responsibility for, the Model Program accounts.
